HI3097E-01A

HI3097E-06A

HI3097E-09A

Very elaborate in construction, with lenses applied by nylon, a bridge welded on the rims externally and a further profile welded on the outside of the lens, decorated with colored glaze.

The thin temples have a sinuous and original design and go perfectly with the thin acetate terminal, embellished at the end, with the metallic logo H.

In addition to the particular construction, both models are characterized by their shape, from the large round to a glamorous square.

The lenses are in Nylon with gradient coloring, base 4, with laser logo on the left lens.

HI3108-A01

HI3108-D01

HI3108-E01

Both models fully respect the brand's DNA; young, current and unique, translated into a very light concept, thanks to the use of steel for the contained internal structure, on which the Nylon lenses have been applied with a degrading effect and large, soft and captivating shapes.

The thin temple has a delicate twist effect, which is combined with an acetate terminal with the Hickmann logo on the end.

HI3112-03A

HI3112-04A

HI3112-05A

This models are offered with the thin steel temple, and the construction of the two eyepieces completely changes, which takes place through the flush fitting of two base four nylon lenses.

This particular procedure makes the glasses light and original.

The shapes differ between a round, regular on the outside and slightly “designed” internally with the use of a vintage-style metal bridge, while the second has an octagonal and modern shape with a linear bridge.

HI3113-E01

Very modern and captivating interpretation of the traditional “club master” style, normally interpreted in a more classical way make the product particularly unique.

A small metal decoration creates a light point on the front area of the eyebrow
The temples are very thin, even in thickness, thanks to the use of Slim Acetate and a flexible steel core.

HI9114-A01

HI9114-E01

Characterized by the original attachment of the very high temple, which goes perfectly with the exclusive shapes of the brand; one slightly cat-shaped rectangular and the other round.

The two acetate fronts are made very thin and light, thanks to the use of Slim Acetate.

The lenses are in Nylon with gradient coloring, base 4, with laser logo on the left lens.

On these models, available in three colors, it is possible to adapt the prescription / sun lenses.
